Pamela Chen

Full Stack Engineer

pmelacodes@gmail.com | github.com/pamelakaylin | linkedin.com/in/pamelakaylin | pmela.io

Software Engineer. Entrepreneurial and user-driven. Project management enthusiast. Experience working in high-growth fintech startups, digital marketing, and client management. Passionate about disruptive ideas that can create global change and elevate quality of life. When I'm not coding I like to surf and travel. Love a good rugby game.

Professional Experience

Software Engineer (Remote), *Shogun*   06/2021 – present
- Managed and maintained core product packages enabling checkout and customer flow for all clients
- Scoped and built out core frontend features and functionality for the external Developer Portal
- Integrated Magento as a third platform into company's frontend product infrastructure
Tech stack: React, TypeScript, GraphQL, Shopify/BigCommerce/Magento APIs

Full Stack Engineer (Remote), *Librai*   04/2020 – 05/2021
- Lead a fully remote development team of 4 engineers as Scrum Master from start to deployment.
- Implemented core functionalities such as computer vision to extract text from images and a personalised recommendation score algorithm.
- Crafted the style and look of the app to create a beautiful, responsive UI.
Tech stack: React, Redux, TypeScript, Sass, Express, Docker, Sequelize, Google Cloud Vision, APIs

Frontend Developer (Remote), *Hunter Digital*   01/2019 – 03/2020
- Implemented client sites and landing pages from concept to deployment.
- Ensured smooth UI/UX through responsive, mobile-first design.
- Collaborated on projects utilizing modern frameworks such as React, Next.js, and Vue.js.

Technical Business Analyst, *Blockchain Advisory Group*   04/2018 – 01/2019
- Provided consulting services to blockchain startups and Fortune 500 companies.
- Developed detailed technical proposals for strategic marketing projects.
- Assisted senior management in project management and reaching 300+ potential clients.
